Degree in Computer Science, I am a software engineer with 8 years of experience in building high-quality web applications. I have developed quality web apps on Ruby on Rails since 2008. Worked 6+ years with Rails in TDD with RSpec, Capybara, and Selenium. 3+ years in React / React Native and Angular. I am passionate about emerging technologies, building scalable software, and supporting industry best practices. Developing many complex systems such as e-commerce sites, inventory management systems, and scheduling systems, I could feel every client's idea. My experience is also augmented with knowledge in 3NF database normalization, usage of design patterns in everyday programming, and building microservices.

EXPERIENCE

Ruby on Rails Engineer

Oct 2022 - Feb 2024

Commerce Kitchen, Calgary, Canada

Backend Ruby on Rails engineer and React.js/React Native developer

Ruby on Rails Engineer

Oct 2016 - Aug 2022
